# Southeast Asia ( 東南亞 / 東協 )

# Background

- 🇲🇾 Rich natural
- 🇲🇾 Colonial history
- 🇲🇾 Fragmented landscape
- 🇲🇾 Diverse language
- 🇲🇾 Conservative culture
- 🇲🇾 Limited incomes, except Singapore and Burnie

>25% of 1430 Bat Species can be Found from 8.8% of Global Land

# My research in SE Asia (2009~present)

# Using Bio-sonar Signals as Indicators of Bat Occurrence and Behaviors

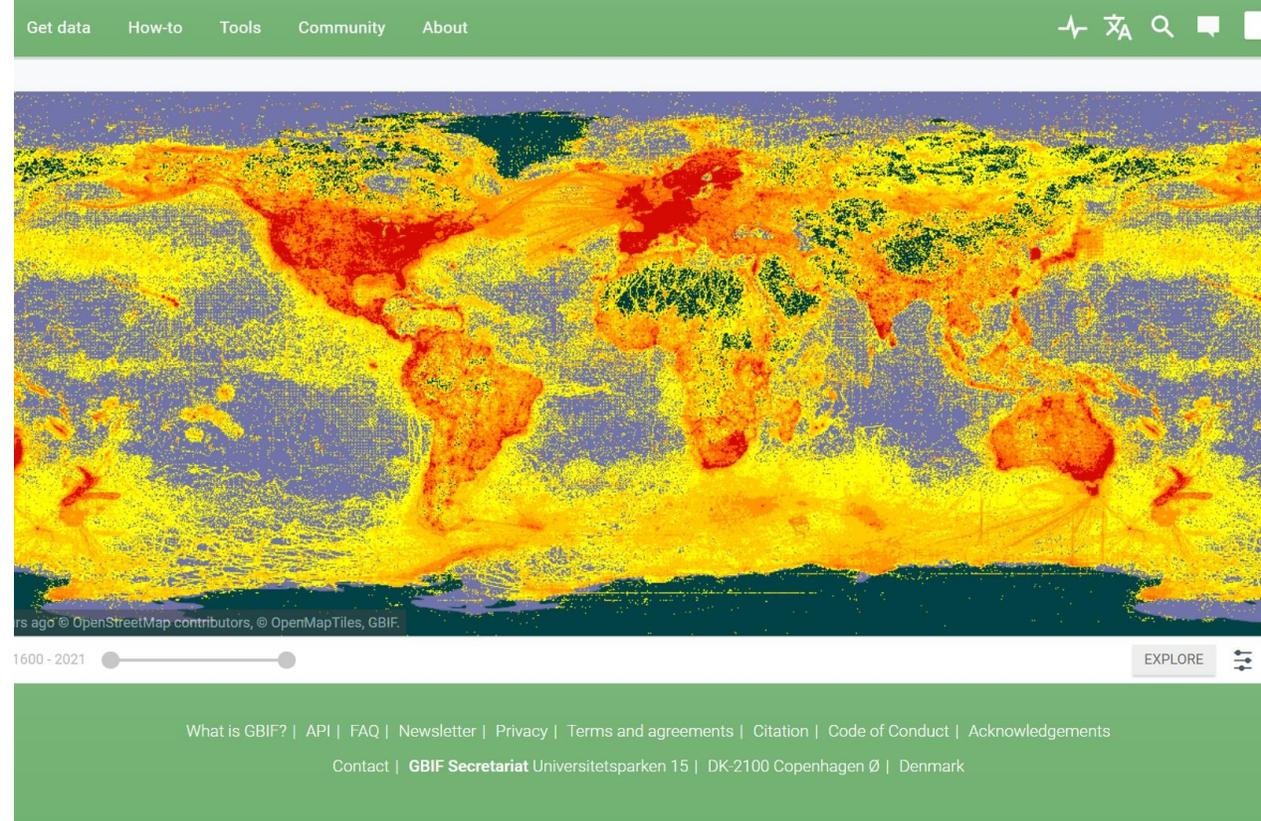

## Necessary (Meta-) data

📌 Species Assessment: georeferenced and timestamped species records are required

In SE Asia, often linked to biological materials (specimen, DNA, tissue), and multimedia files (usually still images)

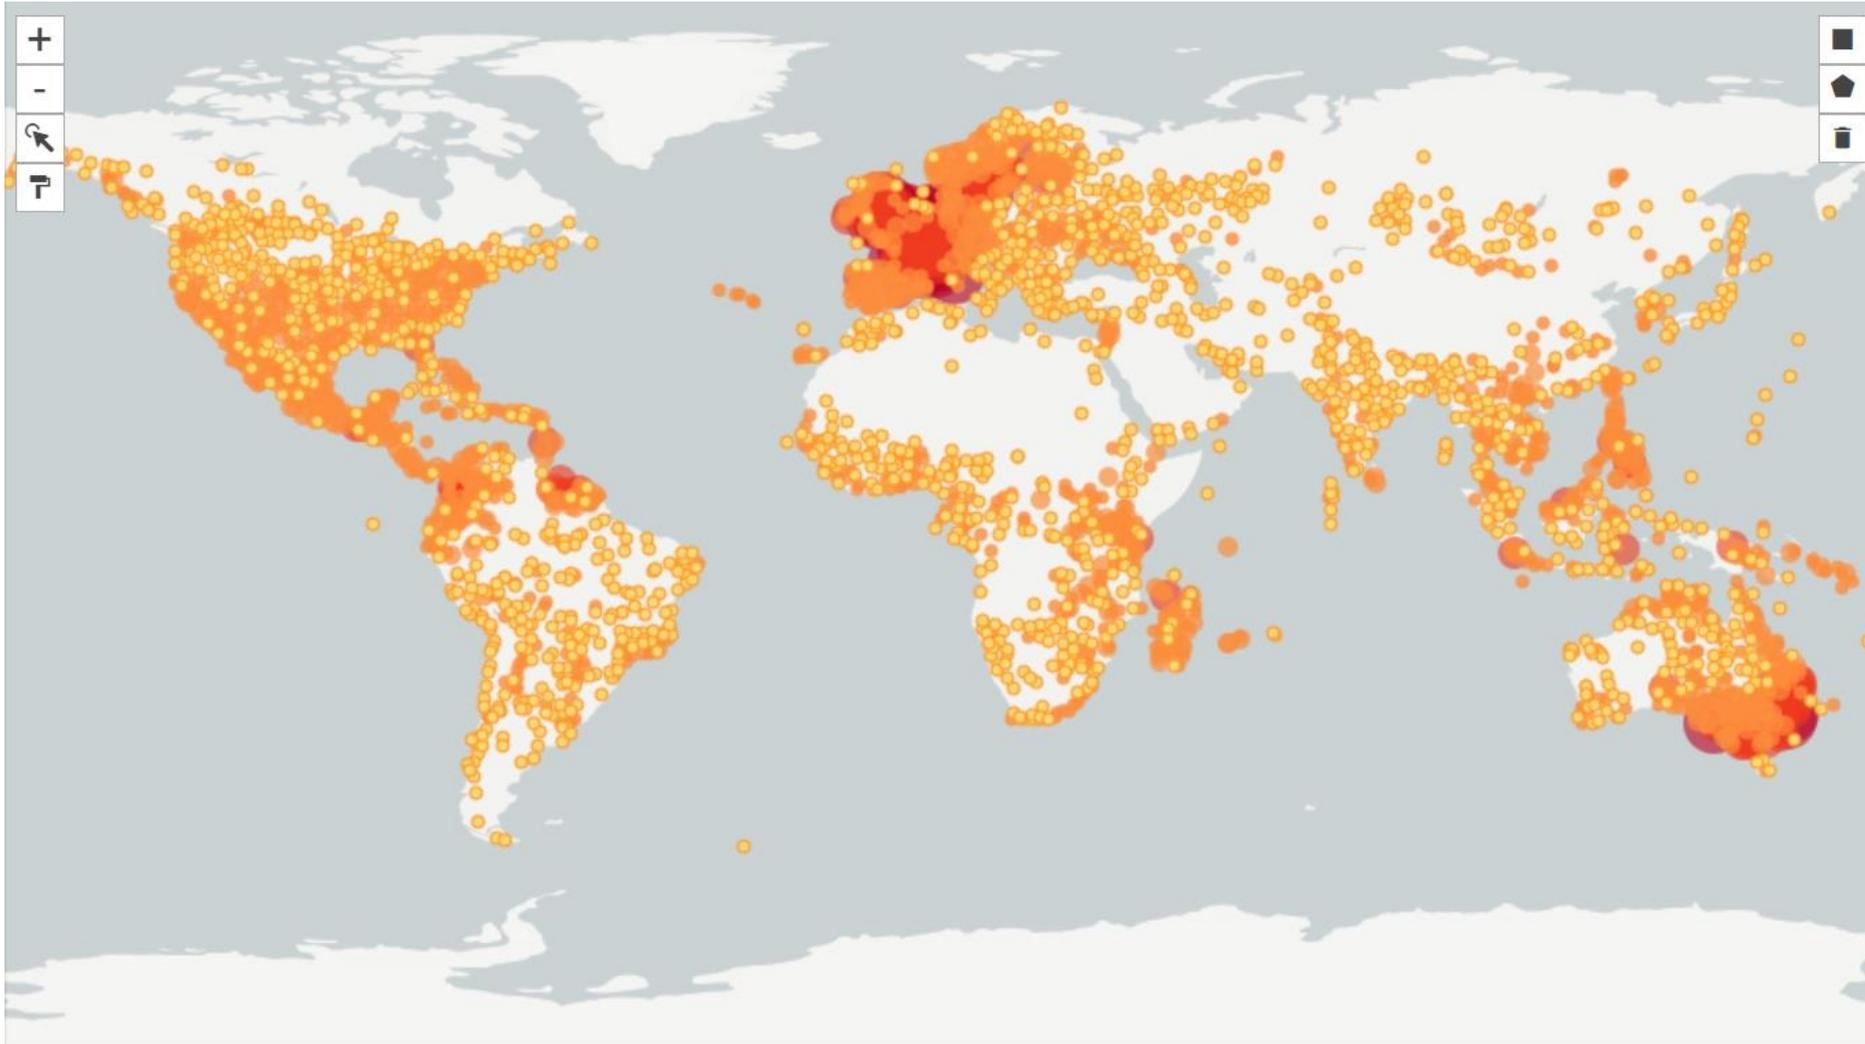

📌 Acoustic Monitoring: audio files needs to linked to species records & recording conditions

<p>Occurrence records <b>1,910,085,941</b></p>  <p>Bio-Dem wins 2021 GBIF Ebbe Nielsen Challenge</p>	<p>Datasets <b>62,445</b></p>  <p>Michael Belitz wins 2021 GBIF Young Researchers Award</p>	<p>Publishing institutions <b>1,746</b></p>  <p>Julen Torrens Baile wins 2021 GBIF Young Researchers Award</p>	<p>Peer-reviewed paper <b>6,283</b></p>  <p>GB28: 28th Meeting Governing Board</p>

# Data Architecture (We Thought)

# Data Architecture (We Need)

# Data Architecture (the Reality)

Data connections are weak, fragmented, and seldomly digitalized

# Issues of Data Clean

- 🇻🇳 Diverse language
- 🇻🇳 No standard format, terminology, punctuation for data from partners across countries, regions, organizations, or labs.
- 🇻🇳 Data format even vary among members from the same lab and among projects of the same researcher
- 🇻🇳 No good behaviors of data management: not fully digitalized, many data are in field note, paper sheets, or embedded in folder, filenames.

Standard form following international codes, e.g., GBIF's DwC fields

# 18,044 bat records: c. 63% of 2002-2020 GBIF occurrence data

# ChiroVox: the Largest Open Sound database of (Asian) bats

The screenshot shows the ChiroVox website interface. At the top, the logo 'ChiroVox' is displayed in green, with the tagline 'The bat call library' below it. To the right of the logo is a photograph of a bat in flight. Below the logo and tagline is a navigation menu with links for 'Home', 'About', 'Sound library', 'Resources', and 'Publications'. The main content area is divided into two columns. The left column features a 'Welcome on our site!' heading, a paragraph of text, and a small image of a bat in flight. The right column features a 'NEWS' heading and a news item dated 23.07.2021. At the bottom right of the screenshot, there are three bullet points in yellow text.

**ChiroVox**  
The bat call library

Home About Sound library Resources Publications

**Welcome on our site!**

Welcome to the ChiroVox website, the home of bat recordings from all over the world! The site is intended to facilitate work with bat sounds and is based on the Asian Bat Call Database, an initiative of the Hungarian Natural History Museum (HNHM) and the Southeast Asian Bat Conservation Research Unit (SEABCRU).

**NEWS**

23.07.2021 The site is running in a beta version and >3900 sound recordings are available mostly from Southeast Asia.

- 3900 recordings from 191 bat species
- Operated since July 2021
- Released with CC licenses (some with conditions)

# What did We not Achieve?

- ⌘ Not changing behaviors of most partners regarding data management
- ⌘ No sustainable plan- lack of funding and resources
- ⌘ Lack of data science specialists
- ⌘ This pandemic slow the development at critical time

# Looking forward

## 🕒 Online tools and training

1. Multi-language interfaces
2. Basic training
3. Implanted into hardware and software
4. Communication

## 🕒 Carrying capacity building

1. Cascade model: from regional network to country- and organization-levels
2. Practical strategies, project-leading, publication helps
3. Fundings

Thank You
